Anti-Human IL-21 receptor (#9Z26)

**FOR RESEARCH ONLY! NOT FOR HUMAN USE!**

Cat.-no.:	101-M505
Size:	100 µg
Lot. No.:	According to product label

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse) immunized with human recombinant protein of IL-21R extracellular domain.

Target Background

Synonyms (Target):	IL21R; NLR; CD360
---------------------------	-------------------

IL-21 R, also called NLR (novel interleukin receptor) is a type I cytokine receptor with four conserved cysteine residues and an extracellular WSXWS motif. It is most closely related to IL-2 R beta and IL-9 R alpha. Mouse and human IL-21 R share 62% amino acid identity. IL-21 R is expressed on lymphoid tissues, peripheral B cells, and cell lines of T, B and natural killer cell lineage. IL-21 mediated signaling requires the common gamma chain in addition to IL-21 R.

Database References Target

Protein RefSeq:	NP_068570.1
Uniprot ID:	Q9HBE5
mRNA RefSeq:	NM_021798.3

Product Specifications

Host	Mouse
Reactivity against	Human
Clonality	Monoclonal Antibody
Clone	(#9Z26)
Isotype	IgG1
Purification	Protein G chromatography
Antigen	recombinant human IL-21 R EC domain
Formulation	lyophilized
Reconstitution buffer	PBS (sterile)

Reconstitution: Reconstitute the antibody with 200 µl sterile PBS and the final concentration is 500 µg/ml.

Stability: Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C. Reconstituted antibody can be aliquoted and stored frozen at < -20 °C for at least for six months without detectable loss of activity.

Remarks: This antibody was selected for its ability to detect human IL-21 receptor.

**AVOID REPEATED FREEZE AND THAW CYCLES!**

Applications

The antibody can be used within the following applications:

WB, IHC

Recommended usage:

Western Blot: 1:500 - 1:1000

NOTE: OPTIMAL DILUTIONS SHOULD BE DETERMINED BY EACH LABORATORY FOR EACH APPLICATION!
