

Name › ReliaTech GmbH

Address/P.O. Box › Lindener Straße 15

Postal Code/City › 38300 Wolfenbüttel

State › Lower Saxony

Contact Person › Dr Markus Heine

Telephone › +49-5331-8586-987

Fax › +49-5331-8586-989

Email › orders@reliatech.de

Website › www.reliatech.de

Social Media › [in](#) [X](#)

Number of Employees › <10

Founded (year) › 1999

Type of Laboratory › S1, DIN ISO 9001:2015

Areas of Activity › Production of growth factors, cytokines, soluble receptors and antibodies
Cell culture (*E.coli*, Sf9, HEK293)
Cell line development for research and preclinical use
Process development
Contract development

External Collaborations › Collaborations with research institutions and industrial partners

Our story

Since its foundation in 1999, ReliaTech has developed into one of the leading European manufacturers of growth factors, cytokines, receptors, mono- and polyclonal antibodies for life science research and industry.

Our biggest aim is to satisfy our customers with products of the highest quality. For this reason, close contact with our customers is very important to us. A short and reliable communication as well as fast reagent supply efficiently support our business.

Our values

We are competent

We competently and promptly advise our customers by using our in-house expertise. If needed we further support our knowledge by a network of experts of various scientific fields. Our know-how is based on a long-term personal experience and the close collaboration with partners from science. These arrangements allow us to offer a broad range of products.

We are cooperative

We stand for a trustful, open and honest cooperation. Our customers can expect speed, flexibility and reliability to support their work. We listen to them carefully and find individual solutions for individual problems.

We are proactive

We are interested in smooth processes and useful product offerings. To achieve this goal we keep contact with our customers and actively care to keep in line with actual demands in trade and science.

We are fair

Our customer relationship is founded on trust, respect and honesty. An open dialogue, engaged at the same level, is important to us.

Our proteins and services

Proteins for research and preclinical applications

From development and production to formulation and quality control, our proteins and antibodies are handled by experienced scientists. With over 25 years of experience, our processes are well optimised. A product release is always based on clear specifications, such as purity, cell-based activity and impurity profile. All products are available in customised filling sizes and quantities.

Animal-free products

A growing number of proteins in our portfolio is produced without any raw materials of animal origin. We are thus making an important contribution to reducing the risk associated with the use of animal-derived adventitious agents.

Contract manufacturing

With our in-house system for transient and stable expression in different expression systems, including process development for cultivation and purification, we offer our customers a customised solution for the production of their protein of interest. The customised protein production is based on a flexible, modular system that allows for an individual selection of different service options depending on your specific needs.

Bioassay service

We offer our extensive expertise in cell proliferation assays to check the biological activity of customer proteins or even the responsiveness of customer cell lines to a specific growth factor. This assay is frequently used as a first step to check the biological activity of a protein up to a validated assay with international standards.

Our quality promise

As an ISO 9001:2015 certified company, achieving the highest quality standards is very important to us. We are constantly working on improving our quality standards and optimising our service. We regularly derive our quality measures from the ICH guidelines and are guided by the specifications of our internal QP
